

ASK US HOW

Our orthopedic surgeons can get you moving again, pain-free.

Joint replacement surgery can be a life-changing solution for painful joints that don't respond to medication or therapy. So, why should you choose Phoenixville Hospital as your destination for joint replacement.

A Dedicated Joint Replacement Program

Our physicians use the most advanced surgical techniques to increase your mobility and reduce your pain. And, we collaborate with a team of specially trained orthopedic nurses, physical therapists and occupational therapists to provide you with personalized care you every step of the way. As a recipient of **The Joint Commission National Quality Approval for Hip and Knee Replacement**, our Orthopedic Center supports every phase of your care, from preoperative classes to spacious, private patient rooms, inpatient rehabilitation and a specialized physical therapy pool.

Patient Education and Preparation

Six weeks before, and three months after your surgery, you'll be equipped with a Hip and Knee Replacement Handbooks to ensure you know exactly what to expect before, during and after joint replacement surgery. And, our pre-op classes focus on discharge planning to ensure you and your family will have a smooth transition back to your everyday life.

A Culture of Wellness and Early Patient Mobility

You'll be out of bed and walking the day of surgery, with additional support and guidance through

daily group physical therapy sessions. By following standardized pain protocols for all of our patients, we decrease the use of narcotics, increase comfort and mobility and minimize nausea, allowing for faster recovery and discharge after overnight stays. Our dedicated nurse practitioners closely monitor your symptoms and clinical progress — which improves overall patient safety and post-op recovery. In fact, most of our patients are discharged within 23 hours, with an average length of stay of 1.2 days.

Patient Satisfaction

Monthly performance improvement team meetings are held with the multidisciplinary joint replacement team to review performance and identify opportunities for improvement, resulting in consistently high patient satisfaction with an average score of 97%. At Phoenixville Hospital, your comfort and satisfaction are always at the center of your care.

Community Education

Free community education seminars led by physicians, nurses and physical therapists are provided throughout the year covering topics such as hip and knee pain, joint replacement and more. To register, visit THOrtho.org.
