Carolyn O'Connor, MD

Neil Sand, DO

PRACTICE FOCUS

Northwest Internal Medicine is comprised of five board-certified internal medicine specialists who are dedicated to high quality health care in the community. We practice comprehensive, preventative internal medicine, as well as manage acute and chronic illnesses. We offer the convenience of same day appointments and in-office lab draws. Our services include procedures such as cryotherapy, EKG, shoulder or knee aspiration/injection, skin biopsies, spirometry, simple suturing and suture removal, superficial abscess/cyst drainage and vaccine administration. Pre-travel evaluations and specialized vaccinations are also available upon request.

An online portal allows for direct communication with physicians to review problem lists, medications and recent lab results.

REFERRALS

Our physicians and staff are committed to making patients' health our top priority. We are currently accepting new patients ages 16 and older. If you would like to refer a patient, please call our office at 215-836-5100.

Karen Sullivan,
MD, FACP

Martha Zubritzky,
MD, FACP
